Consider your landscape requirements and contact CSL.

- Landscaping seems like a personal choice to many people - something that you do simply because you'll enjoy it. There is a lot more to it than that! Landscaping is good for your entire community - especially when it is designed and installed by a landscape professional.
- It will not only add beauty to the neighbourhood, it will raise property values, produce oxygen, reduce temperatures and can also save water. The extra value will pay off when it is time to sell. You will enjoy it - and so will your friends, your neighbours and your environment!

Everyone Wins!

- When you Professionally Landscape your Home Everyone Wins!
- Simply no better way to increase the value of your home. Home buyers said, when surveyed, that home values are increased by over 15% with professional landscaping.
- With most other renovations you spend more than you can ever recoup when its time to sell. Many homeowners add outdoor rooms instead of indoor rooms for this reason. We will present ideas for outdoor living that will suit your lifestyle.

Thoughts on
Landscaping***

Consider the following additional benefits of a professional landscape installation:

- Builds "Curb Appeal" When people pull up in front, the landscape is the first thing they see.
- Easy to Maintain: Why spend your weekend working when you can plan for low maintenance?
- Good for the Environment: A turf area just 50'x50' absorbs carbon dioxide and releases enough oxygen to meet the needs of a family of four.
- Keeps Temperatures Down: Those shady areas are cooler and more trees and shrubs can lower temperatures in a community up to 40%.
- Screens out Sights and Sounds
- Whether it's a busy road or a backyard of kids, a good landscape plan can make it disappear!
- Plants Promote Wellness: Psychologists have found that an attractive landscape plays a major role in reducing stress. Your new landscape can make your home a happier, healthier place.
